Brick Veneer Rainscreen Retrofit

After Gutting a Flooded Home

**Sure Cavity™** (SC 5016 or SC 5032) or **Gravity Cavity™** (GC 1816 or GC 1832)

- **Back-wrap fabric for bug screen**
- **Insulate Stud Cavity with Closed-Cell Spray Foam**
- **Closed-Cell Spray Foam to Reinforce Brick Ties**
- **Existing Flashing**
- **Sure Cavity/Gravity Cavity fabric to face the interior, fasten to stud**
- **Clean out or drill weep holes at lowest point in wall**

Note: The retrofit approach described in this detail is not standard building practice. Consult your licensed contractor, building official and insurance inspector for acceptability of any repair method considered.

Consider using in conjunction with a “wet floodproofing” approach to finishing the interior walls.
