

# Head Joint Weep™

HJW 3845

Time-Saving Weeps and Spacers

## Applications

- ✔ Full Brick
- ✔ CMU Veneer

*Weeps also space brick units for fast & professional install*

## Perfect for Steel Lintels & Shelf Angles

Weeps work when they create a path for drainage at the lowest point in the cavity - in this case, directly on the lintel or shelf angle flashing. Head Joint Weeps are 3/8" wide - the same as a mortar joint - so they act as a time-saving spacer for creating great looking brick joints.

*Head Joint Weeps create weep tunnels directly on flashing*

## The MTI Advantage

- ✔ Weep Tunnels at the Lowest Point of the Cavity
- ✔ Easy to Install
- ✔ Time Saving Spacers

*Head Joint Weep with Sure Cavity on a brick lintel*

## Installation

- Place Head Joint Weep™ as a spacer in each head joint, directly on flashing
- Spread bed joint of mortar on top of first course of brick, tuck point mortar into head joint and tool joint
- Masonry Technology Inc. recommends the installation of a drip plate under all flashings over all steel lintels and shelf angles

Complete Installation at [MTIdry.com/installation](http://MTIdry.com/installation)

## Technical Information

**Material Description** Injection molded 0.24" (0.6 mm) thick acetac
