

Weeps For Lipped Brick

Applications

- ☑ Lipped Brick

Unique Weeps for Hidden Joints

The Concealed Lintel Weep™ is used with lip brick set in a bed joint of mortar. It creates a weep system that moves moisture out of and away from this sensitive detail. The Concealed Lintel Weep™ creates tunnel weeps beneath the bed joint mortar, where an effective weep should be!

Concealed Lintel Weep™ can be field trimmed from stock size

The MTI Advantage

- ☑ Completely Hidden Weep Holes
- ☑ Weeps at the Lowest Point of the Wall
- ☑ 100% Recycled Content

Corrugations create a gap for drainage beneath lip brick

Weeps For Lipped Brick

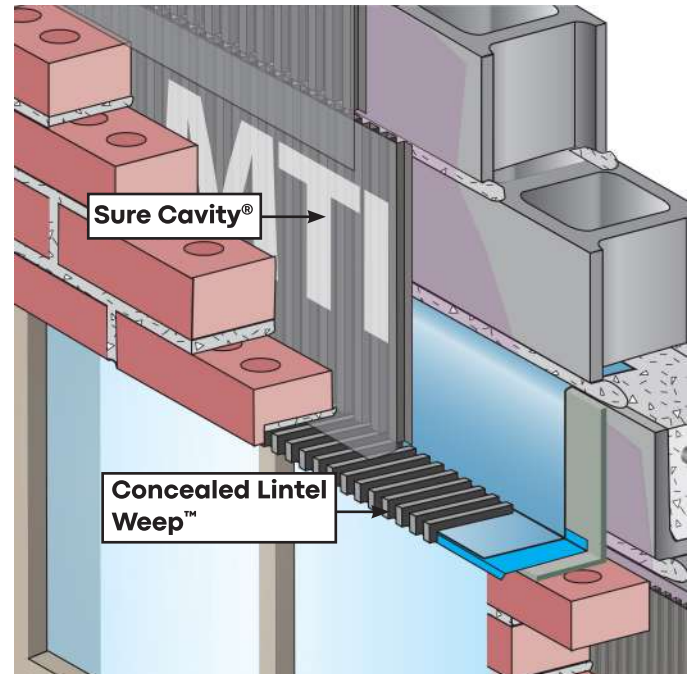

Installation

- Place Concealed Lintel Weep™ on flashing with the short edge protruding downward off the exterior edge of the steel lintel/shelf angle and appropriate drip plate edge.

- The back edge of weep system should be approximately 1/4" from the vertical face of the steel lintel/shelf angle and vertical surface of flashing.

- Lap mortar blocking fabric of Sure Cavity® over Concealed Lintel Weep™.

- Spread bed joint of mortar over Concealed Lintel Weep™ and install the lip brick units.

Complete installation guide and installation video can be found at MTIdry.com/installation

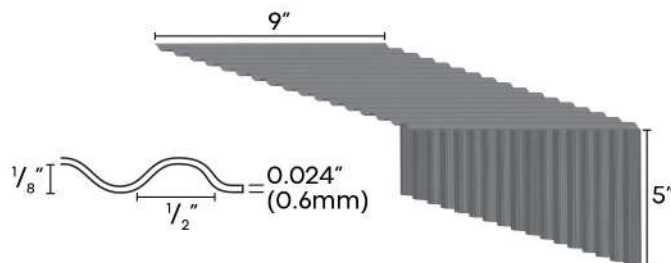

Technical Information

Material Description High impact polystyrene sheets, 0.024 inch (0.6 mm) thick, formed with corrugations.

UV Exposure Over 9 weeks in accelerated UV testing (ASTM G 154)

Fungi Resistance Does not support fungal growth (ASTM C 1338)

Concealed Lintel Weep™ (CLW 9040)

	CLW 9040
Depth (drainage gap)	1/8 in. (3mm)
Piece	4 ft
Bundle	40 ft/10 pieces
Box	240 ft/60 pieces
