

The ONLY Weep Scream That Weeps

## Applications

- ✓ Stucco
- ✓ Thin Stone
- ✓ Thin Brick

## Fact: Most Weep Screeds Don't Weep

Weep screeds allow water to drain to the exterior of the building. L & R Weep Scream features large slots to drain incidental moisture and ventilate the rainscreen wall system. The Weep Scream Deflector™ can be added to divert moisture away from the foundation.

L & R Weep Scream's 1" slots drain directly below the rainscreen drainage plane

## The MTI Advantage

- ✓ Large 1" Slots Weep and Ventilate
- ✓ Accommodates Rainscreen Drainage Plane
- ✓ True Rainscreen Termination
- ✓ Straight Scream Surface

The WRB, rainscreen drainage plane, self furring lath, and scratch coat all fit inside the lip of the L & R Weep Scream™

# L & R Weep Screed™

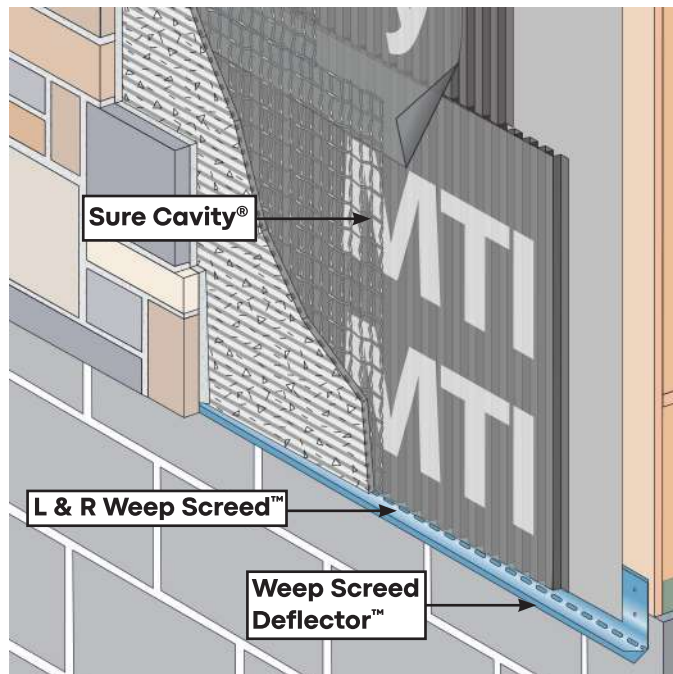

LR 3501

The ONLY Weep Screed That Weeps

## Installation

- Install L & R Weep Screed™ below foundation plate line, run down onto foundation no less than 2".
- L & R Weep Screed™ shall be not less than 4" above the earth or 2" above paved areas.
- Weather resistive barrier shall lap the L & R Weep Screed™ attachment flange.
- Rainscreen drainage plane shall be fully seated in the bottom of the L & R Weep Screed™.
- Exterior lath shall terminate in the L & R Weep Screed™.
